274. For the rational, psychologically healthy man, the desire for pleasure is the desire to celebrate his control over reality. For the neurotic, the desire for pleasure is the desire to escape from reality. - Nathaniel Branden
275. Money cannot buy health, but I'd settle for a diamond-studded wheelchair. - Dorothy Parker
276. Be sober and temperate, and you will be healthy. Be in general virtuous and you will be happy.  
- Benjamin Franklin (1706-1790)
277. It is well to be up before daybreak, for such habits contribute to health, wealth and wisdom. - Aristotle
278. Having good health is very different from only being not sick. - Seneca The Younger, 50 AD

279. A young man with good health and a poor appetite can save up money. - James Montgomery Bailey
280. Without health, life is not life; it is only a state of languor and suffering. - Francois Rabelais
281. When we are well, we all have good advice for those who are ill. - Terrence, 166 BC
282. To keep the body in good health is a duty, otherwise we shall not be able to keep our mind strong and clear. - Gautama the Buddha, 563 BC
283. Life is not merely being alive, but being well. - Martial, Epigrams
284. The trouble about always trying to preserve the health of the body is that it is so difficult to do without destroying the health of the mind. - G. K. Chesterton,
285. Come to Think of It Attention to health is life's greatest hindrance. - Plato
286. The more serious the illness, the more important it is for you to fight back, mobilizing all your resources - spiritual, emotional, intellectual, and physical. - Normin Cousins
287. There is no curing a sick man who believes himself in health. - Henri Amiel, 1877
288. Rest, as soon as there is pain, is a great restorative in all disturbances of the body. - Hippocrates
289. The cure for anything is salt water - sweat, tears or the sea. - Isak Dinesen, 1885-1962
290. To wish to be well is a part of becoming well. - Seneca
291. Every human being is the author of his own health or disease. - Sivananda
292. Pain is inevitable. Suffering is optional. - M. Kathleen Casey
293. The man who fears suffering is already suffering from what he fears. - Michel De Montaigne
294. We are healed of a suffering only by experiencing it to the full. - Marcel Proust
295. A cheerful heart is good medicine. - Bible, Proverbs 17:22
296. To do nothing is sometimes a good remedy. - Hippocrates, 400 BC
297. There are some remedies worse than the disease. - Publius Syrus, 50 BC
298. Most diseases are the result of medication which has been prescribed to relieve and take away a beneficent and warning symptom on the part of Nature. - Elbert Hubbard
299. There are two great medicines: Diet and Self-Control. - Max Bircher, 1962
300. To safeguard one's health at the cost of too strict a diet is a tiresome illness indeed.  
- Francois de La Rochefoucauld
301. What some call health, if purchased by perpetual anxiety about diet, isn't much better than tedious disease. - George Dennison Prentice
302. Simple diet is best; for many dishes bring many diseases; and rich sauces are worse than heaping several meats upon each other. - Pliny
303. Dieting is a system of starving yourself to death so you can live a little longer. - Jan Murray
304. Leave your drugs in the chemist's pot if you can cure the patient with food. - Hippocrates, 420 BC
305. One can not think well, love well or sleep well if one has not dined well. - Virginia Woolf, 1929
306. One meal a day is enough for a lion and it ought to be for a man. - G. Fordyce
307. In general, mankind, since improvement of cookery, eat twice as much as nature requires. - Franklin
308. One should eat to live, not live to eat. - Franklin
309. Food is an important part of a balanced diet. - Fran Lebowitz
310. The biggest disease today is not leprosy or tuberculosis, but rather the feeling of being unwanted.  
- Mother Theresa
311. When the patient loves his disease, how unwilling he is to allow a remedy to be applied.  
- Pierre Corneille, Le Cid
312. Diseases are penalties we pay for overindulgence, or for our neglect of the means of health. - Bulwer
313. All diseases run into one: old age. - Emerson, 1840
314. Diseases are the Price of Ill Pleasures. - Thomas Fuller
315. We forget ourselves and our destinies in health and the chief use of temporary sickness is to remind us of these concerns. - Ralph Waldo Emerson (1803-1882)
316. We are more apt to catch the vices of others than their virtues, as disease is far more contagious than health. - Charles Caleb Colton: Lacon, 1.247
317. A healthy body is a guest-chamber for the soul; a sick body is a prison. - Francis Bacon
318. It is more important to know what kind of patient has the disease than what kind of disease the patient has. - Sir William Osler

319. A doctor would promise life to a corpse if it could swallow the pills. - Napoleon
320. One of the first duties of the physician is to educate the masses not to take medicine. - William Osler
321. The art of medicine consists of amusing the patient while nature cures the disease. - Voltaire
322. Some people think that doctors and nurses can put scrambled eggs back into the shell.  
- Dorothy Canfield Fisher
323. He cures most in whom most have faith.- Galen
324. Oh, the powers of Nature! She knows what we need and the doctors know nothing.  
- Benvenuto Cellini, 1860
325. The great secret of doctors, known only to their wives, but still hidden from the public, is that most things get better by themselves; most things, in fact, are better in the morning. - Lewis Thomas
326. Cur'd yesterday of my disease, I died last night of my physician. - Matthew Prior
327. Doctors cut, burn and torture the sick, then demand of them an undeserved fee for such services.  
- Heraclitus, 500 BC
328. As long as we are liable to die and desirous to live, a physician will be made fun of, but he will be well paid. - La Bruyere, 1688
329. God heals, and the doctor takes the fee. - Benjamin Franklin
330. Some patients, though conscious that their condition is perilous, recover their health simply through their contentment with the goodness of the physician. - Hippocrates
331. It is true that I am carrying out various methods of treatment recommended by doctors and dentists in the hope of dying in the remote future in perfect health. - George Santayana
332. Each patient carries his own doctor inside him. They come to us not knowing that truth. We are at our best when we give the doctor who resides in each patient a chance to work. - Albert Schweitzer, M.D.
333. "The greatest discovery of any generation is that human beings can alter their lives by altering the attitudes of their minds." Dr. Albert Schweitzer ~ 1875-1965 1952 Nobel Peace Prize
334. While other professions are concerned with changing the environment to suit the weakened body, chiropractic is concerned with strengthening the body to suit the environment. - B.J. Palmer, D.C.
335. Intelligence is present everywhere in our bodies... Our own inner intelligence is far superior to any we can try to substitute from the outside. - Deepak Chopra, M.D.
336. There are 206 bones in the adult human skeleton.
337. There are 32 teeth in the adult human.
338. The human body contains 20 times more microbes than it does cells.
339. The lining of your digestive system is shed every 3 days.
340. A human has 60,000 miles of blood vessels in their body.
341. People DO NOT get sick from cold weather; it's from being indoors a lot more.
342. Humans have an estimated 100 trillion cells.
343. The large intestine 1.5m long houses over 700 species of bacteria that perform a variety of functions.
344. Each square inch of human skin consists of twenty feet of blood vessels.
345. Every square inch of the human body has an average of 32 million bacteria on it.
346. Humans shed about 600,000 particles of skin every hour - about 1.5 pounds a year. By 70 years of age, an average person will have lost 105 pounds of skin.
347. Humans shed and re-grow outer skin cells about every 27 days - almost 1,000 new skins in a lifetime.
348. If it were removed from the body, the small intestine would stretch to a length of 22 feet.
349. The human body has over 600 muscles, 40% of the body's weight.
350. The human brain is about 85% water.
351. Though it makes up only 2% of our total body weight, the brain demands 20% of the body's oxygen and calories.
352. The average human brain has about 100 billion nerve cells.
353. Nerve impulses to and from the brain travel as fast as 170 miles (274 km) per hour.
354. The average surface of the human intestine is 656 square feet (200 m).
355. Every year about 98% of the atoms in your body are replaced.
356. There are nearly 650 skeletal muscles in the human body!
357. Three hundred million cells die in your body every minute.

358. It does sounds like a lot but this is actually less than 0.0001% of the amount of cells being replaced in your body every day. (about 10-50 trillion cells are being replace in your body every day)
359. You can survive without food but not without sleep
360. A person will die from total lack of sleep sooner than from starvation. Death will occur about 10 days without sleep, while starvation takes a few weeks.
361. You need sleep as much as you need food. Many people neglect the importance of having enough sleep. With water alone, an average person could survive a month to two without food (that also varies from an individual's body fat and other factors).
362. If you are locked in a completely sealed room, you will die of carbon dioxide poisoning first before you will die of oxygen deprivation.
363. If a person weighing 150 lbs jogs 3 miles, the cumulative impact on each foot is greater than 150 tons.
364. There are 45 miles of nerves in the skin of a human being.
365. Velocity of a signal transmitted through a neuron= 1.2 to 250 miles/hour
366. There are more nerve cells in the human brain than there are stars in the Milky Way.
367. Number of neurons in human spinal cord = 1 billion.
368. By walking an extra 20 minutes every day, an average person will burn off 7 lbs of body fat in a year.
369. Cur'd yesterday of my disease, I died last night of my physician. - Matthew Prior
370. Most diseases are the result of medication which has been prescribed to relieve and take away a beneficent and warning symptom on the part of Nature. - Elbert Hubbard
371. What does interference with transmission of nerve power cause? Dis-ease.
372. What does a properly working nervous system never do? Destroy itself or the rest of the body.
373. What heals the body? The power that made the body.
374. It is easier to stay well than to do what? Get well.
375. What does chiropractic give you? A new meaning of life.
376. If your spine protects your nervous system, what protects your spine? Chiropractic!
377. What "sign of life" is under direct control of the nervous system? Respiration.
378. How many messages does the brain send per second going back and forth from the brain to the body? 3 to 6 million.
379. What happens by the time a child is 4 years old? They may have had over 4,000 impacts to their spine.
380. How does the spine heal without spinal care? Crooked.
381. What type of outside forces work against Innate Intelligence? Unhealthy foods, medicine, chemicals inhaled, etc.
382. What did Hippocrates believe? That the future of health care would belong to the practitioners who use only their hands.
383. If health is not a destination, what is it? A way of life.
384. What happens without life force? Nothing can live.
385. What's the last thing to show up and the first thing to leave? Pain.
386. You are not healthy if what? You have subluxation.
387. What happens if you don't take care of your body? You cannot expect it to take care of you!
388. How do you let your light shine? Take care of your spine!
389. Where should all people go? A no-subluxation zone!
390. What is the ideal state of living matter? Optimal health.
391. What gives life? The arc of life – a healthy neck curve.
392. What does adjusting the spine remove and do? It removes nerve interference and turns the power on.
393. How long will you need to be adjusted? As long as you want optimal health!
394. What never takes a vacation? A subluxation!
395. How does the adjustment affect your white blood cell count? It raises it within 20 minutes, which helps to fight infection.
396. About how many times a day does a child learning to walk, fall? 25 times.
397. What don't drugs eliminate? Subluxation.
398. What would happen if drugs and surgeries made sick people well? Then the people who took the most drugs and had surgeries would be the healthiest people alive.
399. What is your body never suffering from? Lack of drugs or too many organs.

400. How does chiropractic help the body to heal? It removes nerve interference so innate intelligence can flow freely.
401. Where does all life flow from? Above down inside out.
402. You will never know optimal health if you don't have what? 100% nerve flow.
403. How is the body electric? The power must be on to work the nervous system.
404. The health of the human body is directly proportional to what? The health of the spine and nervous system.
405. With a healthy body, how often do you have a new skeleton? Every 90 days.
406. With a healthy body, how often do you have a new liver? Every 6 weeks.
407. When your body is sick what might it create? A fever to cool itself down.
408. How is subluxation like a light switch? It turns off the necessary flow of information from your brain.
409. When the doctor adjusts the spine, it turns the power back on.
410. What does age have to do with subluxation? Nothing! It destroys the health of everyone, at any age.
411. What can subluxation choke? The vital information that travels from your brain to every cell of your body.
412. What does subluxation result in? An unbalanced nervous system, discomfort and disease.
413. Who is known as the developer of Chiropractic? B.J. Palmer.
414. Who is known as the founder of chiropractic? D.D. Palmer.
415. How is your spine like a tree? As a twig is bent so grows the tree!
416. Where do the nerves from the fourth mid back area go? To the gallbladder, heart, lungs, and bronchial tubes.
417. How many moveable bones are in your spine? 24.
418. What do Doctors of Chiropractic specialize in? The detection and correction of vertebral subluxation.
419. How many years does a Doctor of Chiropractic go to college and graduate school? 6 to 8 years minimum.
420. How are chiropractors different? In their ultimate goals for their patients - relief care only or subluxation correction.
421. How long does the adjustment take? A minute or so by the chiropractor but four to six hours for the body to complete.
422. What does long term subluxation result in? Spinal arthritis or degeneration.
423. What causes subluxation? Birth trauma, poor sleeping habits, injuries stemming from work conditions, poor posture, auto accidents, slips and falls, and even genetics!
424. Why is the spine important? It's the house for the nervous system.
425. Who needs to be adjusted? Anyone who wants optimal health!
426. Why should you get adjusted multiple times a week? It establishes a rhythm for optimal healing in the nervous system.
427. When should someone get their first subluxation check-up? As soon as possible after birth.
428. Where does the best doctor on the planet live? Inside of you!
429. You will never know optimal health if you don't have what? 100% nerve function.
430. The maximum weight of a loaded backpack should never exceed what? 15% of your body weight.
431. The health of the human body is directly proportional to what? The health of the spine and nervous system.
432. A healthy neck curve is also known as what? The arc of life.
433. How do adjustments turn the power on? They let the life freely flow from the brain to the body.
434. What can subluxation choke? The vital information that travels from your brain to every cell of your body.
435. What does subluxation result in? An unbalanced nervous system, discomfort and disease.
436. For proper physical and mental health, what must your nerves be? Free from spinal stress.
437. What do subluxations do the nerve energy flow? The cause static.
438. What do subluxations interfere with? The flow of Innate Intelligence.
439. What happens to the body when it is subluxation free? It is in complete harmonious coordination and fulfilling its purpose.
440. Subluxations limit the force that unites what? Innate Intelligence with your body.
441. Subluxation interferes with the transmission of what? Nerve flow.

442. What should you do when subluxations tax your body? Refund your health with Chiropractic care.
443. Why shouldn't you gamble with subluxations? Because an adjustment is the jackpot.
444. What happens to the spinal cord when the vertebrae becomes displaced? It becomes "stressed and compressed."
445. Why is it better to find subluxations early? They are more easily corrected.
446. Chiropractors are the only health care professionals trained to what? Detect and correct subluxation.
447. What do subluxations rob the body of? The energy to think, organize and metabolize.
448. Where there's subluxation, there's what? Less than 100% expression on life.
449. Subluxation is usually silent, like what? Like a cavity or cancer or clogged arteries can be.
450. Innate Intelligence always functions normally as long as what? Subluxations do not block its flow.
451. Healing and balance require what? Time.
452. What do adjustments do, given time? Rebuild and reproduce a condition called health.
453. What does a chiropractic adjustment clear the way for? Innate to operate.
454. How is an adjustment like a puzzle? Putting it back together reveals a beautiful picture.
455. What does Deepak Chopra, M.D. say about your body? It can produce antibodies to any disease known to man.
456. What's the difference between a decaying tooth and a decaying spine? The tooth can be replaced but the spine cannot.
457. What must you do to maintain a healthy lifestyle? Maintain a healthy spine.
458. What does the process of health take? Time.
459. What is the speed of life? 270 MPH – the speed of nerve flow in the body.
460. Who is known as the educator of Chiropractic? David Palmer
461. What happens if you allow a fever to run its normal course? It speeds the healing process.
462. What do the cells of our bodies have? Universal Intelligence that knows exactly how to maintain the body's existence.
463. What does interference to the proper growth of cells lead to? Disease or pain.
464. How is subluxation like an earthquake? If there is a shift of the spinal bones, the effects are felt throughout the body.
465. What is an intermediate declining stage somewhere between life and death? Dis-ease.
466. What is the master system of your body? Your nervous system.
467. How does vertebral subluxation stop innate intelligence? It eliminates nerve flow.
468. What happens if you take care of your spine? It will take care of you.
469. What is 99% of the energy output of your brain used for? Relating the physical body to gravity.
470. What is only 10% of the energy output of your brain used for? Thinking, metabolism, and healing.
471. What does loss of the normal neck curve do to the spinal cord? Stretches it 5-7 cm and produces pathological tension.
472. Where does the power to live flow from? Within!
473. Innate Intelligence flows constantly within us, controlling what? All functions of the body from birth to death.
474. What keeps the power that exists in each of us from expressing its full potential? Restriction, as in interference or subluxation.
475. It is easier to stay well than to do what? Get well.
476. What does chiropractic give you? A new meaning of Life.
477. If your spine protects your nervous system, what protects your spine? Chiropractic!
478. What "sign of life" is under direct control of the nervous system? Respiration.
479. What happens by the time a child is 4 years old? They may have had over 4,000 impacts to their spine.
480. What does adjusting the spine remove and do? It removes nerve interference and turns the power on.
481. Where do the nerves from the fourth low back bone area go? To the prostate gland, muscles of the lower back and the sciatic nerve.
482. What happens to the body when it is subluxation free? It is in complete harmonious coordination and fulfilling its purpose.
483. Where do nerves from the sixth mid back bone area go? To the stomach, esophagus, liver and duodenum.
484. Subluxation interferes with the transmission of what? Nerve flow.

485. Where do nerves from the second bone in the neck go? To the eyes, auditory nerves, sinuses, tongue and heart.
486. Why is it better to find subluxations early? They are more easily corrected.
487. Chiropractors are the only health care professionals trained to what? Detect and correct subluxation.
488. Where do nerves from the first low back bone area go? To the large intestine and uterus.
489. Subluxation is usually silent, like what? Like a cavity or cancer or clogged arteries can be.
490. Healing and balance require what? Time.
491. What do adjustments do given time? Rebuild and reproduce a condition called health.
492. What does a chiropractic adjustment clear the way for? Innate to operate.
493. Where do nerves from the 10th bone area in the mid back go? To the kidneys, appendix, testes, ovaries, uterus, adrenal cortex, spleen, pancreas and large intestine.
494. Why is the neck traction exercise important? It extends the adjustment and helps rebuild necessary tissue support for the spine.
495. Where do nerves from the first bone in the neck go? Blood supply to the head, pituitary gland, scalp, bones of the face, brain, inner and middle ear and the eyes.
496. The sympathetic chain is damaged when subluxation happens where? The top of the spine.
497. What does the sympathetic nervous system control? Eyes, ears and other sense organs; glands and blood vessels of the brain; immune response; bone growth; fat metabolism; reaction to stress; brain function.
498. Where do nerves from the 3rd bone in the mid back area go? To the lungs, bronchial tubes, chest, breasts, and heart.
499. What does interference to the proper growth of cells lead to? Disease or pain.
500. What system in the body controls everything? Your central nervous system.
501. Where do nerves from the eight bone area of the mid back go? To the spleen, stomach, liver, pancreas, adrenal cortex, small intestine and pyloric valve.
502. Where do nerves from the 4th mid back area go? To the gallbladder, heart, lungs and bronchial tubes.
503. How long does the adjustment take? A minute or so by the chiropractor but four to six hours for the body to complete.
504. What does long term subluxation result in? Spinal arthritis or degeneration.
505. What causes subluxation? Birth trauma, poor sleeping habits, injuries stemming from work conditions, poor posture, auto accidents, slips and falls, and even genetics!
506. Why is the spine important? It's the house for the nervous system.
507. Who needs to be adjusted? Anyone who wants optimal health!
508. Why should you get adjusted multiple times a week? It establishes a rhythm for optimal healing in the nervous system.
