Electronic Claims Billing & Patient Account Services for the Chiropractic Office

Our office works extensively with the following cases:

Medicare

Personal Injury

Workers Compensation

General Health Insurance (both in and out of network)

What are the Benefits of Outsourcing?

- **No cost to you for software support or upgrades**
- **No cost to your practice for training or seminars**
- **No "learning curve" for your staff when Medicare or health insurance changes take place (like NPI's or the new CMS-1500 forms)**
- **Frees up you and your staff's valuable time to deal with patient care**
- **We are equipped to handle all patient inquiries in a timely fashion**
- **No "down-time" when your in-house computers break down; our office has excellent software support, backup computers, and off-site daily data backups**
- **Our DB Consultants AS/PC office management software is excellent at tracking claims - nothing will "slip through the cracks"**
- **Longevity - we have been working with Chiropractic insurance claims since 1990, and we LOVE it!**
