Billing and Coding
Learning Objectives

This course provides up-to-date billing and coding procedures. This training will include the presentation of new and accurate CPT Codes and ICD-10 Codes; outdated codes which have been deactivated by insurance companies; and newly generated ICD-10 codes that the Insurance Companies have rendered patient effective. There will also be information provided about the trend towards active care rather than passive care and will be required of a chiropractor in the future relating to CPT billing codes. Information will be given about the proper Established Patient & Management codes (E&M), and how insurance companies qualify doctors' documentation. Lastly, the course will cover topics on workers' compensation and Medicare.

Course Outline

Hour 1: Billing and coding for today's chiropractic market

- Current updates to CPT and ICD 10 codes
- Requirements for chiropractic diagnosis and reimbursement from Aetna, Blue Cross, Blue Shield, CIGNA, Medicare and United Healthcare
