

## **Inexpensive, like-new health-professional items for sale:**

### **1. NAETer Wave**

The NAETer Wave is an electronic instrument used to conduct an evaluation of a patient's energetic health. The process involves measuring the electrical conductivity of a single meridian point on the hand. This point is used to challenge the body with any one or combinations of thousands of energies stored in the data base on the computer. The NAETer's extensive computer database will allow consideration of a wide range of possibilities that might help the patient regain a healthy balance. The NAETer allows consideration of thousands of herbal, homeopathic and nutritional products in combination with the client's energies.

The NAETer is excellent for NAET practitioners who want the opportunity to produce a variety of vials or remedies or for those who want a system for staff to create energetic remedies. The unit includes a dedicated PC.

The software contains all the database and Microsoft updates through 12/16/2015, when it was brought into perfect operation by Bill Clark of 4GlobalHealth, from whom I bought it in December, 2010. He will provide all technical help, which is not available by seller. The inexpensive asking price is due to the buyer having to seek help from Bill Clark at buyer's own cost.

All sales are final. \$6000 plus tax and handling. Credit card information taken on first phone call. Shipping, handling not included; needs be picked up by purchaser's agent within one week.

Contact (510) 658-9066.

### **2. X-Ray Double-View Box**

This X-ray Illuminator has two panels side by side with a high gloss white finish. Manufacturer is Maxant, model #TLS-02. In excellent condition.

\$160 PLUS TAX, plus shipping and handling. Credit card information taken on first phone call. Needs be picked up by purchaser's agent within one week.

Contact (510) 658-9066.

### **3. Hydraulic Hand Dynamometer**

This instrument is primarily used in documenting accurate grip strength deficits due to personal injury in patients. Readings are accurate without the patient being able to feel the handle move. Many insurance companies use the Jamar Dynamometer as a standard testing instrument for compensation determinations.

This dynamometer's condition is like-new, used perhaps a dozen times; model PC 5030J1. It comes with a protective carrying case.

All sales are final. \$130 PLUS TAX, in excellent condition. Credit card information taken on first phone call. Shipping, handling not included; needs be picked up by purchaser's agent within one week.

Contact (510) 658-9066.

#### **4. Functional Acuity Contrast Test (F.A.C.T.)**

The FACT equipment is a tool used to test levels of body toxicity via changes in visual acuity. It was made by Stereo Optical Co., Inc., in Chicago, [www.stereooptical.com](http://www.stereooptical.com) The FACT offers a more sensitive and comprehensive measure of functional vision than does the standard Snellen acuity. It is an excellent addition to healthcare practitioner's tools when evaluating initial and ongoing toxicity due to mold and other pathogens coming from sick buildings.

In Mold Warriors by Ritchie Shoemaker, MD, he describes the problem of mold illness, how to recognize and treat it. FACT is one of the tools he used in his successful efforts to defeat the arguments posed by employers, insurance companies and US government officials who claim that mold "doesn't make anyone seriously ill." His work has demonstrated to the world that buildings can be sick and cause sickness in their occupants.

The unit is in excellent condition and consists of a near chart with calibrated holder, an instruction manual, record forms, a four-color pen and an eye patch. It has been used with 50 or so patients, is in near-new condition and ready to be shipped to a new owner.

\$60 plus tax and shipping. May be picked up by purchaser's agent within one week. Credit card information taken on first phone call.
