

Pediatrics

Presented by: Rochelle Neally, DC

Learning Objectives

1. To share with chiropractors the latest statistics of the health issues facing adults and children today. How we as chiropractors can help our patients avoid becoming a statistic by staying healthy through better choices and chiropractic care.
2. Inform chiropractors on the latest issues and concerns on vaccines. How to educate our patients to make an informed choice.
3. To review the case management of: Autism, Inflammatory issues, obesity and providing alternative nutritional and biomedical protocols.
4. General Anatomy review. The neurological and physiological benefits of the chiropractic adjustment.
5. How to apply adjusting techniques for special needs children and hard to treat cases immediately into their practice.

Pediatrics Outline ~ Presented by: Rochelle Neally, DC
